

Acme Corp - System and Organization Controls (SOC 2 Type II)

Section 1: Infrastructure and Subservice Organizations

Acme Corp relies on Amazon Web Services (AWS) and Google Cloud Platform (GCP) as its infrastructure providers. No other cloud providers are used to host production workloads.

The primary data center region is us-east-1 (Northern Virginia). Encrypted backups are replicated to eu-west-1 (Ireland) every six hours and retained for 35 days.

Section 2: Incident Response and Customer Notification

Acme Corp maintains formally defined criteria for notifying customers of any security incident affecting the confidentiality, integrity or availability of their data. Affected customers are notified within 24 hours of incident confirmation.

Section 3: Monitoring

The service is monitored using Application Performance Monitoring (APM) and End User Monitoring (EUM). Digital Experience Monitoring (DEM) is not performed as part of the monitoring process.
